EDUCATION

Bachelor of Science in software Engineering

Addis Ababa University [🔗](#)

2025 – Present
Addis Ababa

- Addis Ababa University was recognized as the top university in East Africa in 2021.
- Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Database management system, Software Engineering Systems, Fundamental of Networking

Kifiya AI Mastery Programme

10 Academy [🔗](#)

2026 – Present
Online

- Intensive 12-week training in Data Engineering, Financial Analytics, and Machine Learning Engineering.

AI Model Development and Implementation

FUSE AI-201(Florida University South East) [🔗](#)

2026 – Present

- Completed training in Python, machine learning, and NLP, building data pipelines and dashboards for real-world analytics projects across finance, healthcare, and customer experience domains.

PROFESSIONAL EXPERIENCE

Data Analytics Trainee

10 Academy – Kifiya AI Mastery Programme [🔗](#)

2026 – Present
Addis Ababa

- Built end-to-end analytics pipelines for 5+ real-world projects across finance, healthcare, and customer experience domains using Python, SQL, and statistical methods. Developed forecasting system for Ethiopia's financial inclusion (69.4% account ownership by 2027), built RAG-powered chatbot for complaint analysis, and created medical Telegram data pipeline with dbt and FastAPI. Designed interactive dashboards with Streamlit and Power BI for policy recommendations and business intelligence.

PROJECTS

Medical Telegram Warehouse - End-to-End Data Pipeline [🔗](#)

2026

- Built an end-to-end data pipeline that scrapes and analyzes Ethiopian medical Telegram data to identify top medical products, track channel activity, and classify visual content using YOLOv8, enabling data-driven business intelligence for healthcare stakeholders.

Ethiopia Financial Inclusion Forecasting System [🔗](#)

2026

- Developed a time series forecasting system projecting Ethiopia's financial inclusion (69.4% by 2027), quantifying impacts of Telebirr and M-Pesa, and identifying a critical slowdown amid 65M+ mobile money accounts.

RAG-Powered Complaint Analyzer for Financial Services [🔗](#)

2026

- Built a RAG-powered chatbot that reduces complaint analysis time from days to minutes by combining FAISS semantic search with Flan-T5-base LLM. Deployed interactive Gradio dashboard with source attribution and automated data pipeline using Dagster.

SKILLS

- Python, SQL, JavaScript, TypeScript, Java
- Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI
- PostgreSQL, MySQL, Git, GitHub, VS Code, Jupyter, Excel
- EDA, Statistical Testing, A/B Testing, Data Cleaning, Time Series Analysis, Dashboard Design
